Cloud Nine - Bronze

This package has been designed to accommodate functions that utilise venues that have closing times of between 11:00 - 11:30PM typically Community Centres. The Bronze package is far more comprehensive than most mobile disco's in its own right.

It comprises two 4 mtr (13ft) goalpost systems upon which the lighting and video screens are winched up into the air and provide a spectacular overhead lighting display, as well as a substantial frontal lighting display inclusive of plasmas screens and a quality sound system.

Additional charges per half hour apply should the function go on later than 11:30PM and is reliant wholly upon the venue to accommodate the extra length of time.

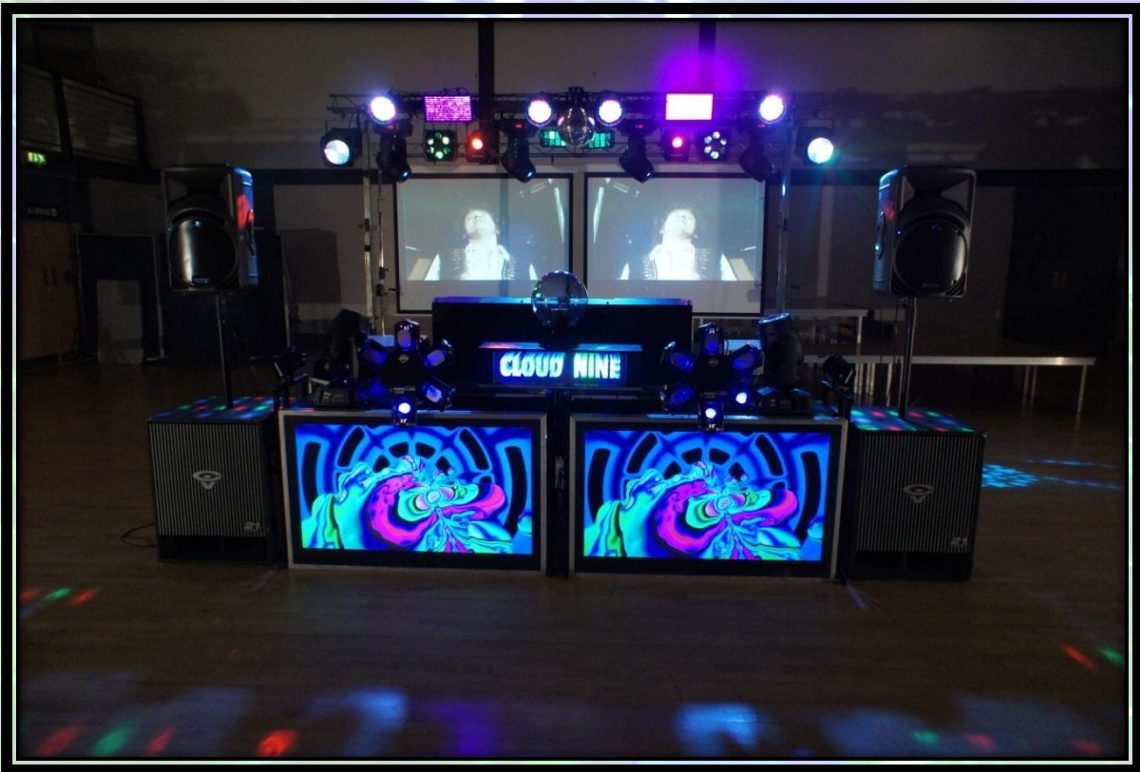

Bronze Package minimum dimensions:

4.4 mtrs 14½ ft (Width) x 2.5 mtrs 8¼ ft (Depth) x 2.5 mtrs 8¼ ft (Height)
